Activity/Sequence of Job Steps		Potential Hazards/ Injury sources		Safe Action or Procedure
Working around small animals		Working with possible chem animals Bites/scrap Allergic react Animal borne pa	ically contaminated es ions	<ul> <li>If the animal is contaminated with a known or unknown chemical agent, the APHIS Safety Officer will confer with and follow the procedures of the Incident Safety Officer.</li> <li>All animals can harbor Staphylococcus aureus and other normal flora that can induce infections through a bite wound, as well as other more animal specific diseases. APHIS personnel should be provided with and utilize work clothing (including gloves and work boots) that the specific animal type would have limited penetration of.</li> <li>The dust and particulate matter in animal areas may cause throat and eye irritation. Goggles and N-95 dust masks are to be used as needed.</li> <li>APHIS personnel should be familiar with the signs of an allergic reaction (sneezing, tearing, watery nasal discharge, congestion, skin rashes, asthma), report to their supervisor if symptoms are noted and be examined by a physician.</li> <li>Basic biosecurity precautions should be taught (see</li> </ul>

\* Supplemental Information

## **Basic Disease Transmission Prevention**

- Wear disposable boots or rubber boots that can be disinfected, if you must visit farms.
- Wash clothing and footwear using an APHIS approved disinfectant after contact with foreign livestock or poultry.
- Clean nostrils and fingernails and wash hair thoroughly after contact with foreign livestock or poultry.
- Dispose of clothing, shoes, equipment, cameras, and other items that are difficult or impossible to disinfect.
- Keep clean clothing and footwear available for visitors to wear if they must be around your livestock or poultry.
- Provide shower-in, shower-out facilities if possible.
- Discourage handling of animals by all visitors.
